

# LAVENDULA *augustifolia* 'Munstead'

## Lavender Munstead

### DESCRIPTION

Compact variety that bears long spikes of deep blue flowers on small gray-green leaves.

Lavender 'Munstead' is also a great choice for containers and rock gardens as it has a smaller habit than other varieties.

Flowering early, this dwarf variety of Lavender is more shrub-like than other lavender and is much more adaptive to heat and humidity than any of the other varieties.

Deadheading will keep this fragrant herb blooming continuously from spring through summer.
