

# Liriope muscari 'Big Blue'

## Lilyturf Big Blue

### DESCRIPTION

Liriope Big Blue is an attractive, tufted evergreen ground cover plants with arching, grass like foliage.

This liriope forces abundant blue flower spikes above the mounded blue green foliage in summer followed by clusters of black berries.

Big Blue is superior for edging or bordering partially shaded areas.

This plant prefers moist, but not wet soils, and can tolerate dry soil conditions once established.

Like most liriope, Big Blue grows 12 to 15 inches tall and wide in partial sun or shade.

Once established these plants are virtually maintenance free.
